Designed & Manufactured in Hillsboro, Oregon

Dual Curve Design

Enhanced thoracic support

Contour allows for easy twisting and full range of motion

SPINAL SUPPORT THAT MOVES WITH YOU. PERFORMANCE THAT LASTS.

The Meo Series is designed to offer a range of 3 back sizes that deliver personalized ergonomic support without compromise. Designed by hand, with built-in lumbar and thoracic foam-contoured support that you can feel the instant you sit down. Add a cervical pillow and notice how the support cradles you from head to tailbone.

More support means less fatigue, better posture, and a more productive work day.

Backed by 46 years of ergonomic expertise, every chair in the Meo series shares a core philosophy: targeted spinal support, balanced freedom of movement, and long-term durability.
